

# Full Maintenance Lease

Comprehensive fleet management

Avis Fleet will take care of every aspect of fleet management for you with a Full Maintenance Lease (FML). This product allows you to lease different kinds of vehicles at a fixed monthly rental for a set period and distance. Our fleet experts will be with you every step of the way to consult on everything from sourcing the right vehicles fit for purpose to procuring, financing, managing and maintaining the vehicle and eventually, disposing of it.

The cost of running a fleet is one of the biggest expenses. With a Full Maintenance Lease, Avis Fleet takes on all the risks of owning and maintaining vehicles, including providing the capital finance and carrying the maintenance and resale risk.

## The benefits of a Full Maintenance Lease include:

- An effective and easy source of financing.
- Improved cash flow.
- Predictable monthly payments.
- Outsourcing of non-core processes (e.g. fleet management, maintenance, fuel, accident management).
- Removal of asset and disposal risks.
- Flexibility of use.

Outsourcing fleet management is the most convenient option for businesses. With a Full Maintenance Lease, one contact person can take care of every aspect of your fleet from procurement to disposal of vehicles.

## Here are a few reasons why you should outsource your fleet management with us:

Avis Fleet is a fleet specialist. We are a fleet management company with solutions designed specifically for fleet management.

Avis Fleet has in-house solutions and value-added products. Not only do our customers deal with one supplier, our solutions are also fully integrated and continuously enhanced.

Avis Fleet has a Level 2 BB-BEE score with a 51.9% black ownership. This means that outsourcing your fleet with us will allow you to receive the maximum benefit of your BB-BEE rating.
