

Driver 360

Comprehensive Auditing Tool

The Driver 360 scorecard is a comprehensive analytical tool that provides you with insights into driver behaviour so you can identify infractions and manage risk.

By using Avis Fleet Telematics and Intelligent Fuel Management, this solution highlights errant driver behaviour that can lead to fines, accidents, vehicle abuse and other incidents of risk.

The tool is designed as a centralised dashboard where you can view driver behaviour and fuel usage at a glance and in detail, helping you to ensure that your fleet is always operating at its peak.

Monitor driver behaviour through Avis Fleet Telematics

The Driver 360 scorecard uses sophisticated metrics from the Avis Fleet Telematics platform to determine driver behaviour patterns, create individual driver risk profiles and assign driver scores. It takes into account the following criteria to build a full view of each driver:

- Road speed
- Harsh braking
- Harsh accelerating
- Speeding
- Excess idling
- Fatigue
- Risk time
- Insurance incidents
- Traffic fines

Assess fuel consumption with Intelligent Fuel Management

The Driver 360 scorecard uses a number of attributes gathered through Intelligent Fuel Management to grade every driver in your fleet from a fuel perspective. The following fuel attributes can be adjusted to suit your fleet and give you the most relevant scores:

- Fuel consumption
- Normal weekend
- Extended weekend
- Monthly litres and kilometres set
- Out-of-bounds fuel stations
- Same-day refills
- Tank capacity exceeded
- Email response times
