

Telematics

Tracking your fleet effectively

Telematics will not only boost your fleet's bottom line, this mobile workforce technology allows managers to harness information to run their fleets in the best way possible.

Avis Fleet Telematics solution will provide you with the necessary information and tools to:

- Effectively manage driver behaviour.
- Realise cost-savings through more efficient processes.
- Monitor unauthorised weekend and after hours usage.
- Reduce accidents and ease the process of dealing with them.
- Relieve administrative burden and improved asset management.
- Improve productivity and vehicle utilisation.

Telematics reporting

Telematics can help you reduce fleet accidents, vehicle maintenance costs and fuel consumption. You can check the data relating to all your drivers and vehicles whenever you like.

- With fleet reporting, you can schedule any of a number of reports that are listed.
- Using the Trip report can also help with your logbook that's compliant with the South African Revenue Service.
- The reports can be set for the last 24 or 48 hours, the last 7 days, the last 14 days, or the last month.

These reports are often used by Fleet Managers to stay in touch with every aspect of their fleet including:

- Overtime and weekend work
 - Early and Late start
 - Driver's license expiry dates
 - Stop report
 - Service reminder
 - Current location
 - Movement report
 - Zone reports
 - Score cards
-
